STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

About SRI

Strategic Resources International (SRI) brings Strategic Reforms and Integrity to our customers in Oracle's journey through its two decades of experience, proprietary methodologies, SRI's Oracle Cloud Labs, and AI-driven solutions in the end-to-end product lifecycle. SRI is a preferred vendor for Oracle consulting services and successfully support through both project and staffing-based engagements.

What We Do

- Enterprise Digital First Strategy
- Differential Cloud Migrations
- Implementation and Configurations
- Maintenance and Support Services
- User Enablement & Empowerment
- Personalized LiveLabs Engineering

Why SRI

- Oracle Preferred Vendor
- Oracle veterans as thought leaders (People Behind People)
- Customer focused
- Oracle Partner
- Quality is integrated

25+ Years of Experience

500+ Happy Employees

100+ Clients

4+ Technology Partnerships

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

About AMD

Advancing High-Performance Computing for the Data Era

AMD is a global leader in high-performance and adaptive computing, powering solutions from cloud data centers to AI workloads and enterprise applications. With a relentless focus on innovation and efficiency, AMD EPYC™ processors are engineered to handle today's most demanding workloads.

Unrivaled Memory Bandwidth & Capacity
For Oracle, MySQL, and AI analytics

Energy-Efficient Architecture
Lowering TCO and carbon footprint

Scalable Performance
Supporting modern ERP, virtualization, and AI inference at scale

Trusted by hyperscalers, enterprises, and research institutions worldwide, AMD is redefining what's possible in enterprise computing.

Together with partners like SRI, AMD is enabling businesses to modernize faster, scale smarter, and prepare for the AI-driven future.

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

Your Oracle Is Ready for AI. Is Your Foundation?

Enterprise AI doesn't begin with a model. It begins with the applications, databases, infrastructure and enterprise data your business already depends on.

At Oracle AI World 2026, Strategic Resources International and AMD are bringing together three priorities that enterprises can no longer treat separately:

Oracle Modernization

Modernize Oracle EBS, Fusion, OCI and MySQL environments while protecting business continuity.

AI-Ready Infrastructure

Improve performance, scalability and efficiency across the infrastructure supporting your most important workloads.

Enterprise AI

Turn enterprise data into practical AI, GenAI and agentic use cases that can move beyond experimentation and into production.

Modernize what you have. → **Strengthen** what AI depends on. → **Build** what comes next.

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

SRI + AMD Solutions

Your Oracle Foundation. AMD Performance. Your Next AI Opportunity.

AI adds new demands to enterprise applications, databases and infrastructure.

Slow queries become more visible. Infrastructure bottlenecks become more expensive. Fragmented data becomes harder to use. And AI pilots become difficult to scale.

That's where Strategic Resources International + AMD come together.

AMD provides the compute foundation.

AMD EPYC™ processors are built for demanding enterprise database, analytics, virtualization and AI workloads.

Strategic Resources International provides the transformation layer.

We assess your Oracle and MySQL environment, identify performance gaps, modernize applications and databases, integrate enterprise data and help implement practical AI use cases.

Together, we help you:

Run faster on what you already own

Optimize critical Oracle and MySQL workloads on modern infrastructure.

Fix bottlenecks at the source

Identify database, architecture and infrastructure constraints before they affect AI initiatives.

Connect enterprise data for AI

Bring together operational, transactional and business information without rebuilding your environment for every use case.

Validate before you commit

Benchmark your real workloads through an AMD + Strategic Resources International proof of concept.

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

The SRI Method

What You Won't Get From a Standard Oracle Partner

Oracle provides the platform.
Strategic Resources International provides the playbook.

Our approach combines proprietary frameworks, accelerators, AI-assisted tools and validation methods built around one objective:

Turn modernization into measurable business outcomes.

01 S·R·I Cloud Framework

S-Cloud → Re-Engineer → Integrate

A structured approach to enterprise modernization.

S-Cloud
Strategy, governance, roadmap definition, cloud readiness and operating model.

Re-Engineer
Modernization through Oracle Integration Cloud, Oracle Cloud Infrastructure and workload transformation.

Integrate
Connect on-premise, cloud and multi-cloud applications with DevSecOps built into the model.

02 SRI XTEND Cloudesk AI

Connect Data → Investigate Signals → Validate Findings → Deliver Insights

Move from fragmented information to explainable insights.

SRI XTEND Cloudesk AI uses AI-assisted investigation and anomaly detection across enterprise information to help teams identify issues, understand potential root causes and validate findings against business context.

Connect Data → Investigate Signals → Validate Findings → Deliver Insights

Less time finding the problem.
More time solving it.

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

03 DigiSRI

Understand the impact before making the change.

DigiSRI applies AI-driven functional and technical impact analysis to Oracle upgrades and quarterly patches. It helps identify dependencies and areas of change earlier—reducing repetitive manual analysis and helping teams move through modernization with greater confidence.

Up to 85% reduction in manual effort.*

*Claim requires final approval for public use.

1. **Analyze** — Identify dependencies and areas of change.
2. **Prioritize** — Focus on what matters most.
3. **Modernize** — Move forward with confidence.

04 iSRI Innovation Hub + SRI Oracle Cloud Labs

Prototype → Validate → Learn → Scale

Not every AI idea belongs in production. The iSRI Innovation Hub and SRI Oracle Cloud Labs provide a fail-fast environment where AI, GenAI and agentic use cases can be explored, prototyped and validated before larger investments are made.

Prove the technology.	Prove the business case.	Scale what works.

05 AMD + SRI Joint Validation

Benchmark before you buy.

Run representative Oracle and MySQL workloads on AMD EPYC™ infrastructure.

Understand:

- Current workload performance
- Infrastructure constraints
- Database behavior
- Potential scalability
- Performance improvement
- Potential economics
- Architecture fit

Oracle & MySQL Workloads → AMD EPYC™ Infrastructure → Compare & Validate

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

ORACLE MODERNIZATION

Modernize Oracle Without Making Modernization the Disruption.

Your Oracle environment may already run the business.
The question is whether it is ready to support what comes next.

Strategic Resources International helps enterprises modernize across the Oracle lifecycle—from core applications and databases to cloud, integration and managed services.

Oracle EBS

Upgrade, optimize and extend existing enterprise applications while protecting critical business processes.

Oracle Fusion Cloud

Move toward modern cloud applications with transformation aligned to operational and business requirements.

Oracle Cloud Infrastructure

Create scalable cloud foundations for enterprise workloads, data and AI.

Oracle Integration Cloud

Connect applications, processes, APIs and enterprise information across hybrid environments.

Oracle Database + MySQL

Improve performance, scalability, availability and readiness for modern workloads.

Managed Services

Continue optimizing, monitoring and supporting the environment after transformation.

Assess → Modernize → Integrate → Optimize → Operate

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

AI-READY INFRASTRUCTURE

AI Needs More Than an AI Strategy.

It Needs a Foundation That Can Keep Up.

Adding AI doesn't eliminate infrastructure problems.
It amplifies them.

When databases are constrained, data is fragmented or compute is inefficient, AI workloads inherit those limitations.

Strategic Resources International + AMD help address the foundation first.

COMPUTE

AMD EPYC™

High-performance enterprise infrastructure designed for demanding database, analytics, virtualization and AI workloads.

DATABASE

Oracle + MySQL Optimization

Assess configuration, performance, scalability and workload behavior to uncover the constraints affecting performance.

DATA

Enterprise Integration

Connect operational, transactional and business information so AI solutions can access the data they actually need.

AI

Production-Ready Use Cases

Prototype and implement AI, GenAI and agentic solutions around measurable business priorities.

Assess → Optimize → Validate → Scale

Performance proof point

Up to **3.9×** MySQL OLTP throughput with AMD EPYC™ in AMD testing.

2P EPYC 9965 vs. 2P Xeon 8592+, AMD test dated Oct. 10, 2024, endnote 9xx5-005A. Different core counts; results vary.

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

ENTERPRISE AI

Move From "Where Can We Use AI?" to "Where Can AI Create Value?"

Enterprise AI should not begin with technology looking for a problem.

It should begin with a process, decision or experience worth improving.

Strategic Resources International helps enterprises turn AI concepts into practical, production-ready solutions connected to the systems and data they already use.

Enterprise GenAI

Enable natural-language experiences around enterprise information, applications and workflows.

Agentic AI

Explore intelligent agents capable of working across data, systems and business processes.

AI-Assisted Operations

Identify anomalies, investigate signals and accelerate root-cause analysis.

Intelligent Automation

Combine AI with enterprise applications and processes to reduce repetitive work and improve decision support.

Enterprise Data + AI

Connect AI experiences to governed enterprise information rather than isolated datasets.

Start small. → Prove value. → Scale responsibly.

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

PERFORMANCE & COST GAP ANALYSIS

Before You Modernize, Know What's Holding You Back.

Instead of beginning with a product recommendation,
Strategic Resources International + AMD begin with your environment.

Performance & Cost Gap Analysis

An assessment designed to identify where applications, databases, infrastructure and data architecture may be limiting performance, modernization or AI readiness.

Workload Performance	Where are latency, throughput or scalability issues appearing?
Database Efficiency	Are Oracle and MySQL configurations aligned with actual workload requirements?
Infrastructure Utilization	Are existing compute resources delivering the performance expected from the investment?
Cost & TCO	Could architecture, consolidation or modernization improve efficiency?
AI Readiness	Can the current infrastructure and data environment support the AI workloads being considered?

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

AMD + SRI POC

Your Workload. Your Data. Your Proof.

Make infrastructure decisions based on your environment, not generic benchmarks.

Through AMD + Strategic Resources International Joint Validation, enterprises can test representative Oracle and MySQL workloads on AMD EPYC™ infrastructure before broader adoption.

01

BASELINE

Understand current workload performance, database behavior and infrastructure constraints.

02

BENCHMARK

Run representative Oracle or MySQL workloads on the proposed AMD EPYC™ architecture.

03

OPTIMIZE

Tune infrastructure, database configuration and workload architecture for better performance and efficiency.

Baseline → Benchmark → Optimize

Start with evidence. Validate what matters.

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

AMD + SRI POC

Compare Results. Decide with Confidence.

Joint Validation helps enterprises benchmark representative Oracle or MySQL workloads on AMD EPYC™ infrastructure before broader adoption. The objective is simple: compare evidence, understand impact and define the right next step.

04

COMPARE

Evaluate performance, scalability and potential economic impact against the current baseline.

05

DECIDE

Use evidence from the validation to shape the modernization, consolidation or AI-ready infrastructure roadmap.

What you take away

Performance Comparison
Baseline vs. proposed workload results.

Optimization Insights
Configuration and architecture recommendations.

Decision Support
Clear direction for next-step investment.

Baseline → Benchmark → Optimize → Compare → Decide

Compare what changed. Decide what comes next.

STRATEGIC RESOURCES INTERNATIONAL

ORACLE | AI World 2026

INDUSTRY FOCUS

Empowering Industries with Advanced Solutions.

Manufacturing

We assist companies of all Industry 4.0 maturity levels in achieving competitive parity through cost-effective tech solutions, aligning modern business requirements with global reach.

FMCG/CPG

We assist CPG companies in adopting streamlined digital solutions that guarantee revenue maximization and effective crisis management throughout the entire value chain system.

Building and Materials

We optimize operations and enhance transparency using efficient project management, AI-based decisions, cognitive automation, and robust financial strategies.

Banking & Financial Services

We help banks digitize, increase efficiency, and align with regulations through innovative solutions.

Food and Beverages

We promote a digital-first approach, implementing AI automation for front-line and back-office teams in the F&B industry.

Federal

We serve federal organizations ensuring 100% alignment with regulatory and compliance requirements and a steadfast commitment to continuous improvement.

Oil and Gas

We synchronize upstream, mid-stream, and downstream systems in the oil and gas sectors using AI automation and a digital strategy.

Healthcare

We guide healthcare clients (Payer, Provider, ISVs, Medical Device Manufacturers) in industry changes, optimizing digital solutions for a unified healthcare experience.

Case Study – Boosting Efficiency at MD Building Products

MD Building Products partnered with Strategic Resources International (SRI) to optimize their Oracle E-Business Suite and improve operational efficiency. Through tailored solutions and SRI's lean methodology, they achieved significant cost reductions and error prevention. The success of this collaboration led to the integration of Lean principles into MD Building's Management and Quality Systems, setting a foundation for long-term business success and resilience.

Our Industry wise top Clients

Manufacturing	AMD, Helen of Troy, md, Buntochips, Softnautics, MOHAWK, PODS
FinTech & Insurance	REBIT, mastercard, Plymouth Rock Assurance, 202 cooper, Fannie Mae, ANGELO GORDON, BlueCross BlueShield, Optum, INSURANCE, Corc
Energy & Utilities	Bloomenergy, CleanHarbors, GE POWER, DUKE ENERGY
Food and Beverage	Panera BREAD, Mount Franklin Foods
Oil and gas	MCDERMOTT, ENBRIDGE
Healthcare	CVS Health

SERVICES OVERVIEW

From Strategy to Scalable Execution.

Strategic Resources International helps enterprises move from assessment to implementation across applications, infrastructure, data and automation. Our services combine consulting, engineering and managed support to turn transformation priorities into practical business outcomes.

Assess › Design › Build › Validate › Optimize

Consult & Assess

1. Current-state analysis
2. Roadmap and architecture guidance
3. Business, data and process alignment

Build & Integrate

1. Cloud, automation and digital solution delivery
2. Application, data and workflow integration
3. Prototype, implement and scale

Run & Optimize

1. Managed services and support
2. Performance monitoring and improvement
3. Continuous optimization and governance

Focus Areas

Applications | Data | Infrastructure | AI / ML | Automation | Security
